AI Intelligence Upgrade

Datasheet | Published 20.06.2022

Sensor Description

AI Intelligence Upgrade for Video Surveillance.

Detect and count animals, track their movement, identify vehicle plates, and monitor activity in real time.

Improve safety, automate record-keeping, and gain valuable insights with AI smart analytics.

Features

- Works with all Farmdeck Video Surveillance.
- Enhances the cameras' ability to process, analyse, and act on real-time video footage and images
- Easy installation.
-

Applications

- Detect and analyse livestock behavior.
- Analyse human activity and detect unauthorised access to prevent theft.
- Differentiate between farm animals, pests (like wild boars or rabbits), and wildlife.
- Identify vehicle plates and track activity.

Works alongside our cameras
